## Objective

---

Enthusiastic Computer Science graduate with a strong understanding of Java programming, OOP concepts, relational databases, Spring Boot, JPA, and REST APIs. Eager to start a career as a Java Developer, apply problem-solving skills, continuously learn new technologies, and contribute effectively to team projects.

## Education

---

|                                                                           |             |
|---------------------------------------------------------------------------|-------------|
| <b>PSR Engineering College-Sivakasi</b> , BE in Computer Science          | 2021 – 2025 |
| • GPA: 7.57                                                               |             |
| <b>Sri Kalaivani Matriculation Higher Secondary School-Tenkasi</b> , HSC  | 2021        |
| • HSC: 91%                                                                |             |
| <b>Sri Kalaivani Matriculation Higher Secondary School-Tenkasi</b> , SSLC | 2019        |
| • SSLC: 87.6%                                                             |             |

## Skills

---

- Languages: Java
- Frameworks: Spring, Spring Boot, Spring MVC
- ORM Tool: JPA, Hibernate
- Database: SQL, MySQL
- Web Technologies: HTML, CSS
- Tools: IntelliJ IDEA, VS Code, Git, GitHub, Maven, Postman

## Areas Of Interest

---

- Object-Oriented Programming
- Database Management System
- Backend Development using Java, Spring Boot, REST APIs

## Projects

---

### Task Flow – Smart Productivity Task Tracker

Tech-Stack : Java 17, Spring Boot, Spring Security, MySQL, JPA, HTML, CSS.

- Developed a secure web app for managing personal tasks with user authentication and real-time UI updates.
- Built a full-stack task manager using Spring Boot, Spring Security, Thymeleaf, and MySQL with secure user authentication.
- Implemented CRUD operations with search, sort, status toggle, form validation, and MVC-based error handling
- Integrated role-based access control and optimized backend performance through efficient JPA queries and service-layer abstraction.

### Fitness Health Club Management System

Tech-Stack : Java, MySQL, JDBC.

- Developed a management system for a fitness club to handle members, trainers, plans, and packages efficiently.
- Implemented CRUD operations to add, update, and delete member, trainer, plan, and package details.
- Designed scheduling functionality to manage trainer and member workout sessions.
- Improved data handling and consistency using MySQL database integration with Java JDBC.

## Internship

---

### Backend Development Internship - Phoenix Softech

June 2024

- Worked on building basic backend modules using Java, focusing on clean code and modular design.
- Developed and optimized simple CRUD functionalities while interacting with MySQL databases.
- Gained practical exposure to backend development workflows, version control (Git), and team collaboration.

### Java & Database Internship - Alpha Web Academy

Jul 2023

- Completed introductory training on Java programming fundamentals and object-oriented concepts.
- Learned the basics of SQL, database design, CRUD operations, and query execution on relational databases.
- Gained understanding of how Java applications interact with databases using JDBC and structured queries.

## Certifications and Achievements

---

### Best Paper Award – Velammal International Conference

Mar 2024

- Received Best Paper Award for presenting the \*Developer Contribution Skill Analyzer\* project.
- The project focused on analyzing developer activity and skills using data visualization techniques and real-world contribution patterns to evaluate performance effectively.

### Java Programming Certification – GeeksforGeeks

- Successfully completed hands-on training in Core Java and problem-solving.
- Learned OOP concepts and applied logic through coding practice.

## Soft Skills

---

- Problem-solving and logical thinking
- Effective communication and teamwork.
- Adaptability and time management.

## Languages Known

---

- Tamil - Native
- English - Proficient
